Professional Experience  
16 Years  
200+ Studies

### Odour Consultant

André has built up broad overall expertise with odour surveys, air sampling, interpretation of emission data and project management. He contributes 10 years of experience as project manager in the field of emission measurements and emission registration studies at all kinds of industries like energy, chemistry, solvent using processes and oil and gas (both on- and offshore production sites) and all related emission compounds (THC, NOx, SOx, particulate matter, inorganic compounds, heavy metals).

### Education

MSc in Environmental Chemistry;  
BSc in Environmental Sciences

### Key Areas of Expertise

- Sampling techniques
- Interpretation of measurement results
- Odour abatement systems
- Tailor made sampling strategies

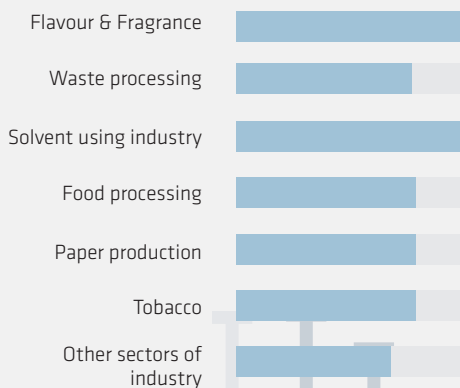

### Reference Clients

- British American Tobacco
- ICL Fertilizers
- IFF International Flavours and Fragrances

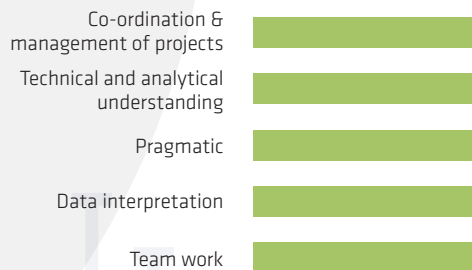

### Remarkable Odour Projects

- British American Tobacco (Groningen NL, 2015/2016)
- British American Tobacco (2014, Saratov Russia): reviewing of odour abatement systems (plasma units) and establishing total emissions of odour and particulate matter.
- ICL Fertilizers (2011-2013): Establishing odour emissions during the extraction of various types of phosphate ores during lab-scale and full scale (production) tests.
- IFF: Ongoing activities in establishing odour emissions and performances of odour abatement systems
