Education

Master of Science in Environmental Management from University of Kiel

Project Engineer/Junior Consultant

Janina is a young environmental professional, holding a Master's Degree in Environmental Sciences, after obtaining a Bachelor's Degree in Geography. She already accompanied us during her studies as a student trainee.

She has experience in learning and working abroad. Currently, she is gaining experience in various odour projects, with the main focus on dispersion calculation and reports on odour issues. Further, she is gathering additional knowledge on odour sampling, odour emission evaluation and odour mitigation.

Key Areas of Expertise

- Odour measurement techniques
- Odour dispersion modelling
- Grid measurement
- Field assessments to analyse odour impact
- Quality management
- Odour lab techniques

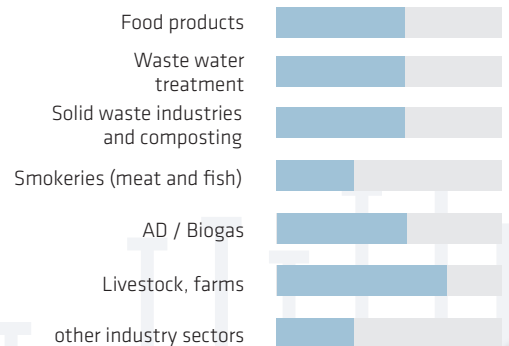

Publications

- Reliability of the results of an odour field inspection - grid method - based on the sample of 104 single measurements within one year; Nose 2022, CET Journal, Vol 95 (2022), Published 15 October 2022
- Contribution to the proceedings of the 9th VDI Symposium on Odours in the Environment, November 2021

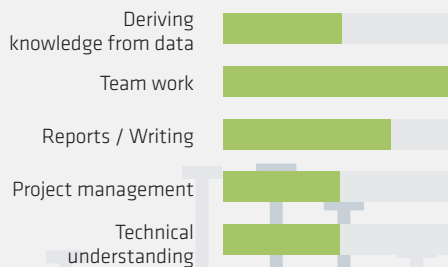

Reference Clients

- Fritz Winter Eisengießerei GmbH & Co KG
- Infracerv GmbH & Co. Höchst KG
- Thermal Conversion Compound Industriepark Höchst GmbH
- Wernsing Feinkost GmbH
- ZVO Entsorgung GmbH
- various municipal waste and wastewater treatment plants
