Education

Master of Science in Agricultural Sciences with specialization in Environmental Sciences from University of Kiel

Project Engineer/Junior Consultant

Ivy Kaye Harms has gained experience as a project engineer in the field of odour measurement (planning, execution, reports) in the last two years in various industries throughout Germany. She also has sufficient experience in olfactometric analysis both in the mobile measurement laboratory directly at the customer's site and in the laboratory in Kiel.

She is the contact person for customers who take samples themselves and send them to our laboratory for olfactometric analysis.

Key Areas of Expertise

- Project engineer
- Odour sampling in several different industries
- Field assessments to analyse odour impact
- Writing reports
- Conducting olfactometric analyses
- Customer service
- Create and revise quality assurance templates

Publications

- Harms, I.K., Dr. Hauschildt, H., Pohfeldt, D.: Results of comparative measurements on biofilters and passive area sources. („Ergebnisse von Vergleichsmessungen an Biofiltern und passiven Flächenquellen“) 9. VDI-Fachtagung Gerüche in der Umwelt 2021, Germany 2021
