Professional Experience

Advanced team player with >1 year of relevant experience

Education

Bachelor of Science in „Physics of the Earth System: Meteorology - Oceanography - Geophysics“ from Christian-Albrechts-University Kiel

Project Engineer/Junior Consultant

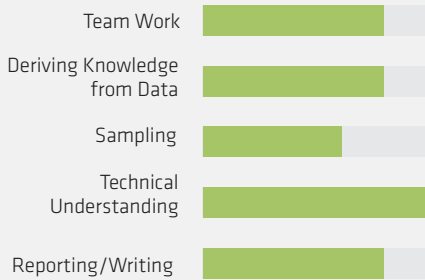

Jonas is a young environmental professional, holding a Bachelor's Degree in 'Physics of the Earth System: Meteorology - Oceanography - Geophysics'. Additionally, he finished his apprenticeship as a physical lab technician.

During his Bachelor thesis, he worked analytically with large climatological datasets on climate variability. While he gained experience in technical processes, sampling as well as calibration, during his apprenticeship.

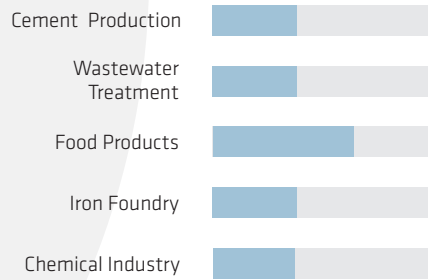

Currently, he is gathering knowledge in various odour projects, with the main focus on different odour-emitting plants, dispersion calculation, sampling, calibration, and reports on odour emission in combination with wind propagation.

Jonas is a native German speaker and brings additional language skills in English.
